АКВАХИМ
AQUACHIM

A variety of laboratory solutions:

- ✓ *Planning*
- ✓ *Design*
- ✓ *Furniture*
- ✓ *Equipment*
- ✓ *Chemicals*
- ✓ *Certified reference materials*
- ✓ *Method development*
- ✓ *Method validation*
- ✓ *Training*
- ✓ *Preparation for accreditation according to ISO 17025 and ISO 15189*

CREATION OF A MODERN ANALYTICAL COMPLEX

Electrochemical measurements

Thermo SCIENTIFIC Orion

pH, conductivity, dissolved oxygen

Turbidity

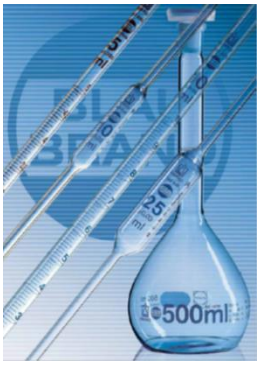

Volumetric and weight analysis

Variable and fixed volume automatic pipettes

BRAND

Instrumental methods

Operational control and monitoring

Thermo SCIENTIFIC

Ammonium
Nitrates
Nitrits
Phosphates
Sulfates
…….

MLE

Precise laboratory control
High quality analysis
High productivity

Ammonium
Nitrates
Nitrits
Phosphates
Sulfates
Total Nitrogen
Total Phosphorus

MLE

Free Cyanides
Total Cyanides

Metals and non metals

TELEDYNE LEEMAN LABS
A Teledyne Technologies Company

Determination of mercury content in concentrations below 1 ppb

- *Fully automated process*
- *High productivity*
- *Exceptional reproducibility*

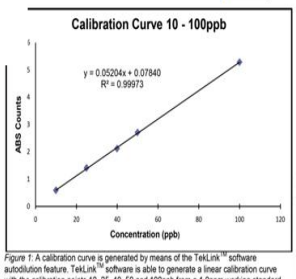

Figure 1: A calibration curve is generated by means of the TekLink™ software autodilution feature. TekLink™ software is able to generate a linear calibration curve with the calibration points 10, 25, 40, 50 and 100ppb from a 1.0ppm working standard.
